September meettions describe their ideas.

Ever since comets began to be seen in the skies, they have been regarded as prophecies of doom. Once the French astronomer Lalanda read a simple scientific paper on comets. Soon a rumor spread everywhere that he had predicted that on May 20 or 21, 1773, a comet would cross the earth's path and produce the end of the world. Nowadays, says Heuer, there is a tendency on the part of some astronomers to "laugh at comets" and "regard them as visible nothings"

Yet it is fairly certain that once a huge comet did strike the earth -and left behind it the Meteor Crater in Arizona, which Svanta Arrhenius declared the most interesting spot on earth. The crater, if it were supplied with seats, could accomodate 2,600,000 spectators. There wouldn't be much use in arranging that, of course, now that television is being made available to everyone.

As for the bomb method of getting rid of mankind, Heuer remarks that Technology has now advanced to the point that we are living "in the Year of the Atom Bomb Eight, It is a question whether we shall be alive in A. B 9 or A. B. 10."

In this book the prophets Fire Co., scheduled for June, 1954 of doom who know exactly what' going to take place and scientists who merely make lively suggestions describe their ideas.

Ever since comets began to be seen in the skies, they have been regarded as prophecies of doom. Once the French astronomer Lalanda read a simple scientific paper on comets. Soon a rumor spread everywhere that he had predicted that on May 20 or 21. 1773, a comet would cross the earth's path and produce the end of the world. Nowadays, says Heuer, there is a tendency on the part of some astronomers to "laugh at comets" and "regard them as visible nothings".

Yet it is fairly certain that once a huge comet did strike the earth -and left behind it the Meteor Crater in Arizona, which Svanta Arrhenius declared the most interesting spot on earth. The crater, if it were supplied with seats. could accomodate 2,600,000 specators. There wouldn't be much use in arranging that, of course, now that television is being made available to everyone.

As for the bomb method of getting rid of mankind, Heuer remarks that Technology has now advanced to the point that we are living "in the Year of the Atom Bomb Eight, It is a question whether we shall be alive in A. B. 9 or A. B. 10."

Convert Your Present Boiler or Furnace to a Timken Rotary Wall-Flame Oil Burner

- · Enjoy the comforts of a TIMKEN OIL BURNER in your home.
- · One day installation.
- · By the time you come home from work we can have your boiler or furnace converted to oil-so don't delay, do it now. Materials are going to be scarce. GET YOURS NOW.

In a Timken Silent Automatic Wall-Flame Olf Burner there is only ONE moving part—the rotor of the electric motor with its integral oil-distributing tubes and fan. All the "work" done by the burner is done by this single part. Nothing else moves. Nothing else wears. No complicated pressure pump (either high pressure or low pressure) is required to force the fuel oil through a pin-point atomizing nozzle. No blower is required to send a blast of air into the

## YOUR HANDS TELL YOU MOST OF THE STORY

Your eyes tell you a lot about Lincoln. You see modern luxury expressed in the clean simplicity of trim, sculptured lines that reject the bulky pomp of yesterday.

Your ears tell you a lot, too. You hardly hear Lincoln's potent 205-horsepower engine -a championship combination of power, efficiency, and great performance.

But your hands tell you most of the per-

formance story. You feel Lincoln's power -the ease of power steering, the smooth response of power brakes and the made-toorder comfort of the 4-way power seat. With ball-joint front wheel suspension, your hands guide this car with astonishing ease.

Try a Lincoln steering wheel in your own hands. We're ready for your demonstration whenever you are!

## YOUR HANDS TELL YOU MOST OF THE STORY

Your eyes tell you a lot about Lincoln. You see modern luxury expressed in the clean simplicity of trim, sculptured lines that reject the bulky pomp of yesterday.

Your ears tell you a lot, too. You hardly hear Lincoln's potent 205-horsepower engine -a championship combination of power, efficiency, and great performance.

But your hands tell you most of the per-

formance story. You feel Lincoln's power -the ease of power steering, the smooth response of power brakes and the made-toorder comfort of the 4-way power seat. With ball-joint front wheel suspension, your hands guide this car with astonishing ease.

Try a Lincoln steering wheel in your own hands. We're ready for your demonstration whenever you are!
